Pen Portrait

Dr. Hui is a Teaching Consultant and an Honorary Assistant Professor of the Department of Mechanical Engineering, The University of Hong Kong. He has a strong technical background in the study of energy efficiency in buildings and is active in promoting building energy and environmental research that integrates architectural design and sustainable building technology through interdisciplinary collaboration. He has good experience in practical building services design and has carried out teaching, research and consultancy studies on building energy efficiency, renewable energy and sustainable architecture. He has published more than 50 technical articles in academic/professional journals and at conferences and has acted as a visiting fellow to research institutes in Japan, Germany and the USA. He has been invited to present research papers at different institutions, forums and conferences in Hong Kong, mainland China and overseas. He has also acted as a Technical Expert in various building energy code projects in Hong Kong, mainland China and Thailand.
